Yes- it is this LOUD!!! Data Centers SUCK!! I'm pleased with the moratorium in the city but this sits right on the outskirts and near the city pool where our children swim. At the city council meeting tonight, I addressed the council and asked the city if soil samples near the data center had been collected, if they were aware of the emissions, if they were doing any additional testing on the water in the city pool, and if any of them had visited Rifle Range? Mayor McNish replied to me that my opportunity to speak was for me to state my opposition or support of the data center and not an opportunity to ask questions. I hate to assume, but I would venture to say that none of these concerns have been addressed. I would also like to note that the city council had a closed session after the meeting to discuss purchase of land within the city. Why would it not be in the best interest of the public to know what land is being purchased with our tax dollars? What reason should this be behind closed doors? 🙄🙄🙄

Gail Peak Brown my Dad lived on hidden meadows . Kit the other side of the tree line . He can hear it running over his window air unit. He said some night is louder than others and keeps him awake.

Amy Dawson MONEY!!! 🤑

 **Katherine Wiltse**  · 1d
Billy Steen That is crazy. I think it is the worst sound I have ever heard. Trent Overhue said it would sound just like a commercial AC unit- not even close. It is unlike any industrial sound I have ever heard. It really is disturbing on a spiritual level.

I feel terrible for all the neighbors. There's a bunch of good hard-working people out there that have put  their resources into their homes. Everyone deserves to come home and be able to relax.  This is wrong on so many levels.

What a VERY unnerving sound...so much so that I had to pause it while commenting because it sounds like something out of a bad sci-fi movie! You should get a decibel meter to document the actual sound levels for future use. Just disgusting...

I'm so sorry Gail and anyone else near it. Noise pollution, light pollution, air pollution....! Plus imagine the poor wildlife, cows, horses, that can't ever get relief from that noise.  It's so awful! Even a few seconds was dreadful. It makes no sense to ruin our beautiful land with this crap! We don't need data centers to live.

Wish the ones that sold this land that stood up and said how much they cared about this community, and seemed to think they were smarter than everyone else had to sit and listen to this shit 24/7 365 days per year.
