September 24 2026 camera publication and related replies

Displayed publisher: Gail Peak-Brown for Webster County Presiding Commissioner

Displayed title: Rifle Range Road Data Center update 9:24/26

<https://www.facebook.com/reel/863341293440883/>

This exhibit reproduces the complete saved Facebook caption file and selected camera-related comment exchanges. Source captions and comments were preserved September 30, 2026. Supporting browser screenshots were captured October 1, 2026.

Page guide: D-2 through D-3, complete automated captions; D-4, Sampson and Saathoff exchanges; D-5, Prewitt exchange; D-6, Overhue comment; D-7 through D-8, supporting screenshots.

Still from the preserved video at approximately 00:28. The still is not a determination of camera brand.

Companion recording: Exhibit D - Video.mp4. Unchanged copy of the Facebook-hosted 720p rendition; 26,751,159 bytes; duration approximately 94.27 seconds. The source acquisition record reports download at 2026-09-30 19:56:54 UTC.

EXHIBIT D - PAGE 2**Complete saved Facebook auto-generated captions**

Automated caption text, not a certified or independently human-verified transcript. Original wording and cue times are retained; line breaks are reflowed. The recording controls if the captions differ from the audio.

Cue 1 | 00:00:00,000 to 00:00:04,001

Today is Thursday, September twenty-fourth and I am coming

Cue 2 | 00:00:04,001 to 00:00:09,521

to you from Rifle Range Road where I have recently had some

Cue 3 | 00:00:09,521 to 00:00:13,121

questions about the postponement of the

Cue 4 | 00:00:13,121 to 00:00:16,721

construction work in the development of Rifle Range. Uh

Cue 5 | 00:00:16,721 to 00:00:20,561

that is not true. We have continue to watch progress as

Cue 6 | 00:00:20,561 to 00:00:24,081

they move forward to complete this project as far as flock

Cue 7 | 00:00:24,081 to 00:00:27,041

cameras. I don't see security here today. Maybe they feel

Cue 8 | 00:00:27,041 to 00:00:30,641

like the flock cameras are keeping them safe but it's

Cue 9 | 00:00:30,641 to 00:00:35,301

right above the cyber truck there. Uh so, there's been some

Cue 10 | 00:00:35,301 to 00:00:38,501

questions for some reason about that but that is where they're

Cue 11 | 00:00:38,501 to 00:00:44,021

located and they're they've been working on. It looks like

Cue 12 | 00:00:44,021 to 00:00:47,141

the generators, they've taken out some blackened pieces they

EXHIBIT D - PAGE 3**Complete saved Facebook auto-generated captions continued**

Automated caption text, not a certified or independently human-verified transcript. Original wording and cue times are retained; line breaks are reflowed. The recording controls if the captions differ from the audio.

Cue 13 | 00:00:47,141 to 00:00:50,821

said and hauled that off. Uh looks like like I said, they're

Cue 14 | 00:00:50,821 to 00:00:55,461

continuing to progress forward. It is not been halted. It are

Cue 15 | 00:00:55,461 to 00:00:58,661

stalled at all every day. They're out here working. It's

Cue 16 | 00:00:58,661 to 00:01:03,161

a little noisier today. We were told that they're only running

Cue 17 | 00:01:03,161 to 00:01:07,321

generators at a time. Uh most of the noise does occur at

Cue 18 | 00:01:07,321 to 00:01:11,241

night. I'll try to get that video for you but that is what

Cue 19 | 00:01:11,241 to 00:01:14,041

it looks like. I'll try to back up where you guys can see

Cue 20 | 00:01:14,041 to 00:01:17,321

what's going on.

Cue 21 | 00:01:19,161 to 00:01:22,781

I hope that helps. If you have any questions, just let us

Cue 22 | 00:01:22,781 to 00:01:29,661

know. Um I appreciate this opportunity to kind of give you

Cue 23 | 00:01:29,661 to 00:01:34,701

an update and I hope you guys are having a great day.

The saved SRT ends at 00:01:34,701; the MP4 container duration is approximately 00:01:34.270. These values are reproduced as recorded, without retiming.

EXHIBIT D - PAGE 4**Selected camera-related comment exchanges**

Text reproduced from the September 30 capture and rechecked against the visible October 1 discussion. Page names and tagged recipients identify the participants; capitalization, spelling, and substantive qualifications are retained. Displayed times do not state a timezone.

Eugene Sampson Jr. - September 24, 2026, 3:47 PM

Get ready to have flock cameras all around. Marshfield, that's what these stupid things are for we need all these data centers to store the millions of pics These things take

Gail Peak-Brown for Webster County Presiding Commissioner - September 24, 2026, 5:12 PM; Author; Edited

Eugene Sampson Jr. Data Centers and Flock cameras usually go hand in hand, but luckily, to my knowledge there haven't been any installed in Marshfield. Hoping to tackle one project at a time.

Michael Saathoff - September 25, 2026, 1:27 PM

Gail Peak-Brown for Webster County Presiding Commissioner this is not really true, at lease locally. Flock cameras could host their data anywhere in the world. It's not likely that this center would be storing/processing local camera data. They don't come like salt and pepper. You can have one locally without the other.

https://www.facebook.com/reel/863341293440883/?comment_id=1823524215327401&reply_comment_id=1778371659876023

Gail Peak-Brown for Webster County Presiding Commissioner - September 25, 2026, 3:44 PM; Author

Michael Saathoff I'm just speaking about what has happened in our local counties, with the exception of LACLEDE

EXHIBIT D - PAGE 5**Security-related comment and response**

Text reproduced from the preserved September 30, 2026 capture. This exchange was not located in the October 1 view; no conclusion is drawn about why it was not displayed.

Susan L Prewitt - parent comment in the September 24 discussion

There are the issues as important if not more important in the county. Have there ever been flock cameras there? Why would they take them down and put them up again? Is a private business not allowed to have ways to maintain security?

Gail Peak-Brown for Webster County Presiding Commissioner - September 24, 2026, 8:44 PM; Author; Edited

Susan L Prewitt I am personally not aware of any Flock camera issues in the county. It's their land and they have the right to use it as they see fit. We haven't any signed industrial ordinances at this time. Why wouldn't they be allowed security?

https://www.facebook.com/reel/863341293440883/?comment_id=2333948377009442&reply_comment_id=1308712911276070

Capture scope

The text on pages D-4 and D-5 reproduces selected exchanges, not the complete discussion. The September 30 capture showed 32 of 35 top-level comments with selected reply threads expanded. Hidden comments and some other replies were not captured.

"Edited" identifies the displayed status; earlier versions were not obtained. Full saved text captures, original captions, acquisition records, and file hashes are retained with the source material.

The original MP4 remains unchanged. Still images and screenshots are reproductions for reading alongside that recording. No person has executed a transcript certification or authentication declaration as part of this exhibit.

EXHIBIT D - PAGE 6**Overhue comment in the same discussion****Trent Overhue - September 24, 2026, 12:53 PM as displayed**

Text captured October 1, 2026 from the account displayed as Trent Overhue. This is a reproduction of his public comment, not independent verification of the equipment identity.

Gail,

I think everyone is growing tired of you running your campaign on misinformation and deception to create fear within the community and gain votes. You should be ashamed of the way you have chosen to conduct yourself.

1. Those are jobsite lights—not cameras, and certainly not Flock cameras. That said, if I choose to install lawful surveillance cameras on my property, I am fully within my rights to do so.
2. You continue to edit and distribute videos that misrepresent the noise levels at the property.
3. You continue to spread false information regarding the project's water usage.

I am not going to tell you how to run your campaign. However, if you intend to win an election by misleading the public, I fully expect the people of Webster County to recognize your lack of honesty and integrity.
